INSPECTION PROGRAM

The Poultry Products Inspection Act (71 Stat. 441, as amended; 21 U.S.C. 451 et seq.) requires Federal inspection for wholesomeness of all poultry and poultry products processed in poultry processing plants engaged in interstate and/or foreign commerce. The purpose of poultry inspection is to assure consumers that poultry processed under the inspection program is wholesome, free from adulteration, truthfully labeled and handled under prescribed conditions of sanitation and operating procedures.

A voluntary poultry inspection service, authorized under the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.), is provided on a user-fee basis for product which is not subject to the Poultry Products Inspection Act.

GRADING PROGRAM

The purpose of the Poultry Grading Program, authorized in the Agricultural Marketing Act of 1946, (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.) is to provide financially interested parties a National grading service on poultry, eggs and rabbits and an inspection program on egg products based on official U.S. standards and grades and minimum sanitary and operating requirements. It advises producers and others about improved methods and practices of handling, processing, standardizing, grading, packaging and marketing of poultry and egg products. It establishes a basis for quality and price relationship, enabling more orderly marketing, expanded market outlets providing quality relationship returns to the producer. Officially graded product enables the consumer to buy with confidence and expectation of receiving product in accordance with the quality labels on the product.

MARKET NEWS PROGRAM

The Federal Market News service is authorized under the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621 et seq.). Its principal function is to assemble, verify and analyze market prices and other related market information; to provide producers, handlers, processors, merchandisers and others with current day-to-day marketing information; and to furnish specific "on-the-spot" trade information needed quickly for Government purposes.
